Re: Review of Plan of Operations, Red Dome, Inc. Red Dome Volcanic Cinders,
M/027/032, UT-055-91-01, Millard County, Utah

Dear Mr. Anderson:

Last August 31, 1993, the Division completed the review of your Plan of Operations, and sent our comments to you. The comments outlined areas of the plan that were found deficient requiring additional information to complete the application process.

On September 1, 1993, your secretary contacted this office and informed us that you were going in the hospital for surgery and would not be able to respond immediately to our concerns. Five months have passed and we have not heard anything further from your office.

We hope your surgery went well and that you have fully recovered. We would like to finalize the state permitting process for your mine site as soon as possible. If possible, please provide us with your response to our August 31, 1993 review by March 4, 1994. Once we reach a tentative approval stage, a newspaper notice will be published initiating a 30-day public comment period. Providing no adverse comments are received, the Division will then seek approval from the Board of Oil, Gas and Mining on the final form and amount of reclamation surety before final approval of your permit can be granted. As this process will take some time yet, we would like to proceed ahead as soon as possible.

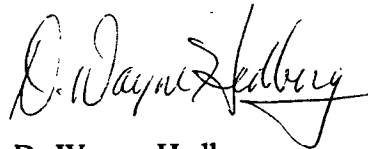

We do not wish to be placed in a position that would force us to initiate enforcement action to achieve compliance with the Utah State Mined Land Reclamation Act. We wish to work with you to the extent possible to bring about an expeditious conclusion to this permitting requirement.

Thank you for your prompt attention in helping us finalize this permitting action.
Please contact me, or Travis Jones of the Minerals staff if we can be of assistance or answer questions in this regard.

Sincerely,

A handwritten signature in cursive script, reading "D. Wayne Hedberg". The signature is written in dark ink and is positioned above the printed name and title.
